PROFESSIONAL SUMMARY

Senior Azure Infrastructure Engineer with 15+ years of experience designing, migrating, automating, and supporting enterprise IT infrastructure. Led the migration of 100+ servers to Azure and engineered highly available Windows environments supporting 300,000+ automated tasks. Proven record of maintaining 99.98% infrastructure availability, reducing backup costs by 90% with projected annual savings of CAD\$200K, and automating complex operational processes with PowerShell, C#, and Python. Strong background in Azure, Windows Server, Active Directory, disaster recovery, high availability, infrastructure automation, and technical leadership.

CORE TECHNICAL COMPETENCIES

CLOUD & INFRASTRUCTURE - Azure, Azure Site Recovery, Azure Infrastructure, Intune, Active Directory, Windows Server, Linux, Office 365, File Servers, DFS, Failover Clustering, SFTP

AUTOMATION & DEVOPS - PowerShell, Python, C#, .NET, Terraform, Git, Batch Scripting, Docker

HIGH AVAILABILITY & DR - High Availability, Disaster Recovery, Storage Replica, Failover Clustering, Azure Site Recovery, Backup & Recovery

WEB & APPLICATION INFRASTRUCTURE - IIS, Apache, NGINX, SSL/TLS, SSH, Web Farms

MONITORING & OPERATIONS - New Relic, Infrastructure Monitoring, Root-Cause Analysis, Incident Response

DATA & COLLABORATION - SQL, Power BI, SharePoint, Confluence

PROFESSIONAL EXPERIENCE

Manulife Business Processing Services | 2017 – 2025

Systems Administrator > Senior Infrastructure Administrator

- **Led the successful migration of 100+ servers from on-premises to Azure**, including high-availability (HA) file clusters, web farms, SFTP clusters, and Certificate Authority (CA) clusters.
- **Maintained a 99.98% average monthly uptime with zero outages for over two years** for high-utilization infrastructure by implementing automated remediation and proactive root-cause analysis.
- **Executed backup solution optimizations resulting in a 90% cost reduction**, generating a projected annual savings of **CAD\$200K**.
- Restructured ownership of 9,000+ Azure resources to improve cost attribution, financial transparency, and accountability.
- Established infrastructure operating standards and security-compliance procedures for critical global infrastructure.
- Streamlined and administered team SharePoint and Confluence platforms, ensuring adherence to company security protocols.
- Mentored junior team members through coaching and project engagement, resulting in their successful transition into leadership roles.
- Developed "**SkriptSked**", a C# app to automate the scheduling and execution of PowerShell scripts across multiple remote hosts, enhancing operational efficiency.

- **Engineered a resilient Windows Server environment** with high-availability and Disaster Recovery (DR) capabilities supporting 300,000+ automated tasks.
- Deployed Varonis Security System to a global infrastructure consisting of 40+ Windows Servers to support enterprise security applications and monitoring of thousands of servers.

TeleTech Philippines | 2009 – 2017

Systems Software Engineer > Senior Systems Software Engineer (2015 – 2017)

- Developed "**Defender Fixer**" to resolve workstation compatibility issues for remote applicants, **preserving thousands of potential jobs** and ensuring business continuity for work-at-home programs.
- Developed "**SnapLog**" a .Net application to help diagnose system and network connectivity issues of remote employees.
- Served as lead consultant for the G2AD project, automating employee login and access provisioning allowing accounts and their corresponding accesses be made available within 24 hours.

Associate Administrator > Supervisor, Systems Administration (2012 – 2015)

- Accelerated the career progression of 80% of the team into higher roles, leveraging their collective achievements and successful project completions.
- Developed "**HireLines**" (Applicant Queuing System) and "**Agent Issue Tracker**" web apps to centralize data and automate tracking for multiple global sites.

Regional Technology Support Associate > Senior Specialist, Desktop Support (2010 – 2012)

- **Recovered a 300+ seat site from a major outage in under 24 hours**, restoring production capabilities ahead of schedule.
- Developed a power-saving script that **reduced site power consumption by 20%**.
- Created "**Avaya Launcher**" to secure and standardize softphone settings for **6,000+ workstations**, built "**NetSense**" for automated physical network disconnection detection and logging and "**Network Toolbox**" for centralized deployment of scripts for IT.

Senior Technical Support Associate (2009 – 2010)

- Developed "**Comet**", a web-based customer status inquiry system for Telstra to improve the tier 1 agents' handling time during their calls.

eTelecare Global Solutions | 2006 – 2009

Level 2 Resolutions Specialist

- Managed technical escalations and remote support; pioneered the Total Resolutions Program for Dell Small Business, establishing a career-long focus on continuous improvement and systematic problem-solving.

STI College Santa Rosa | 2000 – 2003

Systems Support Assistant

- Maintained computer labs and managed student accounts via Active Directory while providing foundational hardware and software support.

TECHNICAL CERTIFICATIONS & TRAINING

- Microsoft Certified: AZ-900 - Azure Fundamentals
- Microsoft Certified: AI-900 - Azure AI Fundamentals
- Microsoft Certified: AZ-100 - Azure Infrastructure and Deployment
- ITIL v4 Foundation Certified
- Philippine Coding Camp: Cloud Support Engineering (DevOps)
- Google: Introduction to AI
- PowerShell Expert Training: PS Fundamentals & PowerShell for System Admins
- GovLearn.PH: Technical Writing – A Guide to Effective Office Communications
- Mapua Malayan: Full Stack Software Developer Professional Certificate
- SharePoint Administration
- Microsoft Intune Workshop
- Microsoft Active Directory Administration
- TESDA: Computer Hardware Servicing II

PROFESSIONAL AWARDS

- 2024 IS Stars of Excellence Awardee
- 2024 ACE Gemstone Projects - Quality Improvement
- 2024 Outstanding Achievement Group Award
- 2019 Q4 IS Shining Star
- 2019 Q4 Top Performer
- 2018 IS Top Performer
- 2018 Hall of Fame (Q1, Q2)
- 2016 Top Performing Employee (Q1, Q2)
- 2012 Best G&A Employee
- 2011 & 2012 TeleTech Recognition Program Awardee
- 2007 Most Technically Proficient Employee

EDUCATION & ACADEMIC ACHIEVEMENTS

STI College Santa Rosa

- Bachelor of Science in Computer Science | 2003
- Associate in Computer Studies | 2000-2003

Academic Achievements:

- IBM ACM International Collegiate Programming Competition representative (2003, 2004)
- TESDA IT Skills Competition Marathon: 1st Place Regional, 3rd Place National (Open Category)
- STI Regional Cluster Champion: INTO Programming contests (2002–2004) and IT Matters contest (2002).
- Recognized as Best Programmer of the Year and Student Achiever of the Year
- Graduated first honor, Best in Academics, Visual Arts and Computer Application
